✓ Dental Instruments: Scalers, Cures, Explorers, Excavators and Probes.

High quality 440A stainless steel tips are used to replace the old and worn out tips. "Better than new Quality" at a fraction of the cost of replacing the instrument.

(Please note: Some instruments cannot be retipped, such as American Eagle plastic handles and solid one piece instruments. Handle replacement is needed if cracked, starting at \$5.00 per handle. Also, bands need to be removed for the retipping process.)

✓ Wire Cutters (Distal End and Ligature), Needle Holders and Pin/Plate Cutters.

Specially developed tungsten carbide inserts are extremely durable. Many doctors claim them to be stronger and better than original tips.

And Much More!!!
